

- 1) GIVEN: A 3 kW motor drives a 25mm shaft at 50 rev/s  
Power is drawn from the shaft by gears as shown.  
REQ'D: Torque, max shear stress and deflection in each segment of the shaft. (H5.31)

$$T_{CB} = \frac{P}{\omega} = \frac{3000 \text{ W}}{50 \text{ rps}(2\pi)} = \underline{9.549 \text{ N}\cdot\text{m}}$$

$$T_{BA} = \frac{P}{\omega} = \frac{1000 \text{ W}}{50 \text{ rps}(2\pi)} = \underline{3.183 \text{ N}\cdot\text{m}}$$

$$\tau_{CB} = \frac{T_C}{J} = \frac{9.549 \text{ N}\cdot\text{m}(0.0125 \text{ m})}{\frac{\pi}{2}(0.0125 \text{ m})^4} = \underline{3.11 \text{ MPa}}$$

$$\tau_{BA} = \frac{T_C}{J} = \frac{3.183 \text{ N}\cdot\text{m}(0.0125 \text{ m})}{\frac{\pi}{2}(0.0125 \text{ m})^4} = \underline{1.04 \text{ MPa}}$$

- 2) GIVEN: The nut on the right end of the  $\varnothing .5$  in aluminum rod is just barely snugged up when  $T = 70^\circ\text{F}$  and a load of  $P = 16 \text{ lb}$  is applied.  
REQ'D: Reactions at A and B when  $T = -10^\circ\text{F}$   
 $E_{al} = 10.6 \times 10^6 \text{ psi}$      $\alpha = 12.8 \times 10^{-6}/^\circ\text{F}$

$$0 = \Delta_P - \Delta_T + \delta$$

$$0 = \frac{PL}{AE} - \alpha L \Delta T + \frac{P_L}{AE}$$

$$0 = \frac{16 \text{ lb}(5 \text{ in})}{\frac{\pi}{4}(.5 \text{ in})^2(10.6 \times 10^3)}$$

$$- 12.8 \times 10^{-6}/^\circ\text{F}(13 \text{ in})(70 - (-10)^\circ\text{F})$$

$$+ \frac{F_B(13 \text{ in})}{\frac{\pi}{4}(.5 \text{ in})^2(10.6 \times 10^3)}$$

$$F_B = \underline{2125 \text{ lb}}$$

$$\sum F_x = 0$$

$$16 \text{ lb} + 2125 \text{ lb} - F_A = 0$$

$$F_A = \underline{2141 \text{ lb}}$$

- 3) GIVEN: The shaft is supported by a smooth thrust bearing at A and smooth journal bearing at B.  
 REQ'D: Draw the shear and moment diagrams for the shaft and indicate the maximum shear and moment. (H6.33)

$$\sum M_A = 0$$

$$-900(1) + B_y(2) + 400 = 0$$

$$B_y = 250 \text{ N } \uparrow$$

$$\sum M_B = 0$$

$$-A_y(2) + 900(1) + 400 = 0$$

$$A_y = 650 \text{ N } \uparrow$$

CHECK:

$$\sum F_y = 0$$

$$650 - 900 + 250 = 0$$

$$0 = 0 \checkmark$$

$$V_{\max} = 650 \text{ N}$$

$$M_{\max} = 650 \text{ N}\cdot\text{m}$$
